

# Keysight Case Study

## The Brief

After a comprehensive tender stage, Oaktree Interiors successfully secured the opportunity to work with Keysight Technologies UK, a major occupier on the Winnersh Triangle Business Estate in Berkshire. Following the initial meeting with their Facilities Manager our Design Team carried out a site survey and proposed visuals & layouts to bring some new life into their current office with a fresh, modern & quirky feel, reflecting Keysight Technologies' corporate identity. Once the layout had been agreed our Contracts Team were then tasked to carry out a full site survey of the premises to check infrastructure and existing amenities.

## The Solution

The main requirements were to re-vamp/refurbish approximately 14,000 sq ft on the Ground & First floor office areas. The works included: the re-decoration of the Boardroom, and other meeting rooms, the Kitchen/Restaurant, Breakout Area, Reception and the open plan office areas for approximately 40-60 personnel with space for future expansion. Oaktree continues to provide support to Keysight Technologies for their future requirements and other UK projects.

*"What can I say, the experience with Oaktree has been fantastic. From my first meeting with Perry, and then Natalie, Carl, Jay & Brian which was really positive, you took our comments and produced exactly what we wanted. The results show how amazing the office now looks. We also had the added challenge of the works being done while we had people on site but on the whole that worked well. So thanks to all of you at Oaktree. I would definitely use you again."*

Julia McDonald, Facilities Manager / Workplace Solutions UK / Nordics
