

case study...

Over £4 Billion, 60,000 workers and 6 years to build...

Oaktree Interiors are proud to be part of the Heathrow Terminal 5 project. Oaktree were chosen by Travelex as the Design & Build Company to provide them with 13 currency exchange bureaus across the new terminal. With over 30 million people passing through the Terminal 5 doors each year, Travelex needed to be seen as the natural partner to contact in the currency exchange industry and the new

units, which are attention grabbing and stylish, certainly seem to reflect the image the company wish to portray.

Oaktree personnel were first on site in March 2007, and with the majority of staff being on site daily, we soon got to know how to deal with the sometimes overwhelming and challenging procedures that were part and parcel of one of the largest construction projects the world has ever seen.
